DSL USB Modem Quickstart Guide – WingNET Internet Services
For Zoom ADSL USB 5510

∎∎∎ ∎ ∎

A. Installation

1. Insert the supplied CD into your computer. The CD starts automatically and the "Main Menu"
opens: (**Note:** If the CD does not start automatically, from the desktop, go to **Start | Run** and then
type **D:setup.exe**, where **D** is the letter of your CD-ROM drive.)

2. Click the **ADSL** Modem Installation Wizard button.
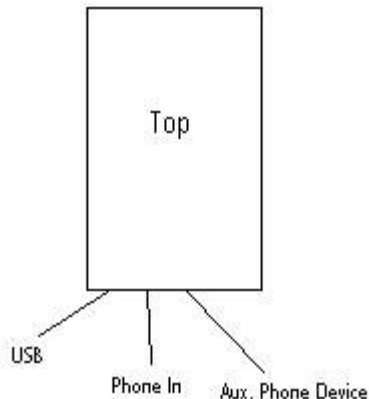

3. Click the **USB** option.

4. You may see the following warning message. Please
click "Continue Anyway."

5. Please follow the rest of the prompts to finish the
installation.

B. Setup

1. Connect the USB cable and the phone cord. Plug the
included dual DSL filter that has both a phone and a
DSL port into your wall jack. Run the phone line from
the DSL jack on the filter to the Phone In port of your modem (see diagram below).

2. Once the installation is complete, you will see a Zoom icon on your desktop. Double-click it to
display the Network Password dialog box. Enter "admin" as the user and "zoomadsl" as the
password.

3. On the "Basic Setup" page, enter your username as username@wingnet.net.

4. Enter your password.

5. Click "Save Changes," then click "Write Settings to Flash and Reboot" to complete the setup.

*DSL filters will need to be placed on each telephone device in your house. This helps keep DSL
signals seperate from your voice signals. For more information about your modem, please consult
the manual that came with your USB modem.
